# Hepatitis C AccuVert<sup>™</sup> Seroconversion Panel PHV919 (0610-0217)

## **INTENDED USE**

The Hepatitis C (HCV) AccuVert<sup>™</sup> Seroconversion Panel PHV919 (0610-0217) is intended for use by diagnostic manufacturers, researchers, and clinical laboratories to develop, evaluate, or troubleshoot HCV test methods. Characterized samples and comprehensive data are provided for comparative analysis. For research use only. Not for use in diagnostic procedures.

## **PRODUCT DESCRIPTION**

This product is a 7-member HCV seroconversion panel. Panel members represent serial bleeds from a single individual during the development of a HCV infection and subsequent response. No preservatives were added.

Item No. 0610-0217

1 vial per member 7 members, 1.0 mL per vial

## STORAGE

Panel members should be stored at -70°C or colder. SeraCare Life Sciences recommends that the panel members be divided into smaller aliquots to avoid multiple freeze-thaw cycles, if appropriate. If turbidity or particulate matter is observed, the samples should be centrifuged in accordance with each test kit manufacturer's instructions for sample preparation.

## INTERPRETATION OF RESULTS

The Data Sheet for HCV AccuVert Seroconversion Panel PHV919 is available at <u>www.seracare.com</u>. The Data Sheet lists results for panel members generated using commercially-available screening, monitoring, and confirmatory test methods. Tests were performed at SeraCare or at recognized reference laboratories (RL) by individuals who routinely use these procedures. Information regarding specific test methods is available on the Data Sheet. Data Sheets are updated when new data are available.

## LIMITATIONS

The HCV AccuVert Seroconversion Panel PHV919 is offered for research use only, not for use in diagnostic procedures. Data are provided for informational purposes. SeraCare Life Sciences does not claim that others can duplicate test results exactly.

## PRECAUTIONS

Follow Universal Precautions<sup>1</sup>. The units that make up this panel were tested and found negative for anti-HIV-1/2 and HBsAg. This does not ensure the absence of these or other human pathogens.

Do not pipette by mouth. Do not smoke, eat, or drink in areas where specimens are handled. These materials should be disposed of in a manner that will inactivate pathogenic agents.
